German quality standards
Fully-automated production lines and seamless monitoring of the process and material ensure the quality that the company sets as its benchmark for its sites worldwide.

TUV “Power controlled”
With the new TUV Rheinland test “Power controlled” it is guaranteed that the performance indicated for a Sunmodule Plus solar panel is being met and that it is regularly monitored by the independent test service provider, TUV Rheinland. This additional security for investors and consumers is a further testament of SolarWorld’s commitment to comprehensive quality assurance.

SolarWorld Plus-sorting
Plus-sorting guarantees the highest system efficiency. Only modules that achieve the designated nominal performance or greater in performance tests are dispatched.

25 years linear performance guarantee and extension of product warranty to 10 years
SolarWorld guarantees a maximum performance degression of 0.7% p.a. in the course of 25 years, a significant added value compared to the two-phase warranties common in the industry. In addition, SolarWorld is offering a product warranty, which has been extended to 10 years.*

*In accordance with the applicable SolarWorld Limited Warranty at purchase.

Minor reduction in efficiency under partial load conditions at 25°C: at 200W/m², 95% (+/-3%) of the STC efficiency (1000 W/m²) is achieved.

COMPONENT MATERIALS

- Cells per module: 72
- Cell type: Poly crystalline
- Cell dimensions: 125 mm x 125 mm
- Front: tempered glass (EN 12150)

SYSTEM INTEGRATION PARAMETERS

- Maximum system voltage SC II: 1000 V
- Maximum reverse current: 16 A
- Increased snowload acc. to IEC 61215: 5.4 kN/m²
- Number of bypass diodes: 3

THERMAL CHARACTERISTICS

- NOCT: 47°C
- TC $I_{\text{s}}$: 0.034 %/K
- TC $U_{\text{o}}$: -0.34 %/K
- TC $P_{\text{mpp}}$: -0.48 %/K

ADDITIONAL DATA

- Measuring tolerance: +/-3%
- J-Box: IP65
- Connector: MC4
- SolarWorld Plus-Sorting*: $P_{\text{flash}} \geq P_{\text{max}}$

1) The output identified by SolarWorld ($P_{\text{flash}}$) is always higher than the nominal output ($P_{\text{max}}$) of the module.
